Give Your Child a Strong Start with Year K EM Course!

The early years of school are among the most important of a child's academic life. The habits, skills, and attitudes formed in kindergarten don't just shape the year ahead, they form the bedrock of everything that follows. That's why we've designed the Year K EM Course with such care: to give young learners the very best possible start.

EM (covering English and Mathematics) represents the two core pillars every Kindergarten student needs to develop with confidence. But this course goes further than simply introducing concepts. It creates an environment where children feel excited to learn, safe to try, and proud of their progress. Through carefully sequenced lessons, playful activities, and warm encouragement, students build genuine competence alongside a love of learning.

Led by our experienced Year 1 teachers, the program is designed to bridge the gap between Kindergarten and Year 1, giving students early exposure to upcoming concepts so that the transition feels smooth, familiar, and exciting rather than daunting.

By the end of Term 3, your child will be better prepared, more confident, and genuinely ready for what comes next.

Enrol today and give your child the foundation for long-term academic success.

Year K Term 3 Course

(Saturday, 18 July – 26 September)

Course	Session	Class Time	Class Location
Year K	Saturday MC	9:00am – 12:30pm	Strathfield Head Office

Year K EM Course (Saturday)

Our Year K EM Course is thoughtfully designed to help young learners build a strong academic foundation in both English and Mathematics. Through structured lessons, hands-on activities, and a nurturing learning environment, we help children develop confidence, curiosity, and a genuine love for learning.

Why Choose EM Course?

- Early Academic Advantage:** By introducing essential literacy and numeracy skills now, we help them develop the building blocks needed for long-term academic success. Students gain familiarity with classroom routines and foundational concepts that will support them throughout primary school.
- Engaging & Interactive Lessons:** Our EM program is built around the idea that learning should be enjoyable. Each session includes a mix of guided instruction, hands-on activities that keep students engaged and excited. Our experienced teachers use appropriate methods to encourage participation, exploration, and independent thinking.
- English Mastery:** Students build their reading skills through engaging, age-appropriate texts that develop both fluency and understanding. They practise recognising words, following meaning across sentences, and answering questions about what they have read all essential habits for lifelong literacy. Lessons are structured to build confidence at every step, no matter where each child is starting from.
- Mathematical Confidence:** The numeracy component introduces foundational maths concepts including counting, number recognition, basic addition and subtraction, shapes, and patterns. Rather than rote memorisation, students learn to understand numbers and what they represent, building the kind of mathematical intuition that makes Year 1 maths feel manageable and enjoyable.

Year K EM Course - Timetable & Class Location
